FOREWORD

The "Statistics" issue of ILLINOIS LIBRARIES serves as a mirror for us "to see ourselves as others see us." However, as in all mirror likenesses, each librarian will realize that mere figures do not tell the whole story.

Service to your community as a librarian or trustee includes that personal equation that cannot be portrayed by figures. For this reason we at the Illinois State Library are most happy when we can meet you in your own library and feel the effect you have on your community.

We are again printing the American Library Association Standards. The reports show that no library meets all the standards.

Income of $1.50 per capita, when covering a small area, still does not bring in enough money to carry on good library service. For this reason larger areas of service are advocated.

The Illinois State Library has been carrying on a program of demonstrations of the larger service unit in six districts during the past year. Thumbnail sketches of these are found in this issue.

The law on the Making and Filing of Annual Reports is again included. We are pleased that so many librarians and trustees were prompt in sending in their reports so that they could be included in this issue.

Suggestions for revisions and additional information will be appreciated.

STANDARDS FOR PUBLIC LIBRARIES

"The essence of the many standards for public libraries may be compressed into three basic elements, all of which are necessary in a planned program of library development:

1. Complete public library coverage.
2. Library service of adequate quantity and dynamic quality.
3. Large units and cooperation in library service.

Library Income

"The following minimum per capita standards of support are recommended for varying stages of development of library service in areas with 25,000 population and over:

For limited or minimum service.....$1.50 per capita
Minimum total income.....$25,000

Registration

For adult borrowers: 20 to 40 per cent of the population 15 years of age and over.

For juvenile borrowers: 37 to 75 per cent of the population from 5 through 14 years of age.

Circulation of Books

For adult books: 3 to 10 volumes per capita for the population of 15 years of age and over.

For children's books: 10 to 30 volumes per capita for the population from 5 through 14 years of age."

1. Many communities have increased their population tremendously, so that the figures upon which the income is based and the 1940 census figures are not the same.
2. Registration figures should show only names of people who actually use the library in a given year or biennium. Only when this is true can they be interpreted in terms of library service.
3. Book stock has not been included in the above tabulation. Many factors enter into keeping the book stock up to date and usable.
4. The standards for circulation per capita for adults and juveniles has not been reached.

This directory is a result of a survey made during January, 1949, by the Medical and Hospital Division of the Illinois Library Association. Questionnaires were sent to all hospitals listed in the American Hospital Association Directory and related institutions. It should be noted that often hospitals which are near a university, association or public medical library do not maintain a large library of their own. The Committee which compiled this directory is grateful to the Illinois State Library for including it in this issue of ILLINOIS LIBRARIES.

—ELIZABETH EATON, Chairman.
